

How to remove flashed image from eMMC storage.

11 July 2022 12:32

1. Insert SD card with OS image flashed on it for bananaPi
2. In the terminal write below command to format

```
sudo dd if=/dev/zero of=/dev/mmcblk1
```

3. Wait.. It can take 30 minutes or more and it shows no processs update on the terminal

This command will wipe out eMMC storage (format the eMMC storage)
