Installing pymssql on ubuntu

12 July 2022   12:36

1. Change the user permission for below folder to 755

   ```
   cd /
   sudo chmod 755 /usr/
   ```

2. Install pymssql using below commands

   ```
   sudo apt-get update -y
   sudo apt-get install -y freetds-dev

   sudo apt install unixodbc-dev

   pip3.8 install pymssql
   ```

3. `pip3.8 install pyserial`

4. If dev/ttlS0 port is not open for serial inward communication

   ```
   sudo adduser $USER dialout       (note do not replace USER with username. Use
   command as it is)
   ```

5. Set /dev/ttyS0 file permission (follow next page)
